

Assignment -4

Docker and Kubernetes

Assignment Date	26 October 2022
Student Name	MADHAVE SUSHEEL S
Student Roll Number	713319CS071
Maximum Marks	2 Marks

1.Pull an image from docker hub and run it in docker Playground

The screenshot displays the Docker Hub interface for the repository `uifd/ui-for-docker`. The repository is marked as deprecated, with a note stating: "This repo is deprecated. Development continues at: [portainer/portainer](#)". The page shows the repository's overview, including a description: "A web interface for the Docker Remote API. The goal is to provide a pure client side implementation so it is effortless to connect and manage docker." The Docker Pull Command is shown as `docker pull uifd/ui-for-docker`.

Below the Docker Hub interface, the Docker Playground environment is shown. The instance is named `cd9an2u3_cd9av060qau0008hbjs0` and has an IP address of `192.168.0.13`. The terminal output shows the following commands and their results:

```
# This is a sandbox environment. Using personal credentials #
# is HIGHLY discouraged. Any consequences of doing so are #
# completely the user's responsibilities. #
# The FWD team. #
